

91. A method of performing hyperthermal therapy comprising the steps of:

inserting a catheter, including an antenna and at least one temperature sensing

device, into an organ:

irradiating the organ by generating radiation using the antenna:

simultaneously with irradiating, providing a supply of a fluid comprising a

cytotoxic substance through the catheter and into the organ.

REMARKS

In a Communication dated April 21, 1999, the Examiner indicated that the claims filed in the Preliminary Amendment on June 15, 1998, do not comply with 37 C.F.R. § 1.121(b) because they were not underlined. The Examiner required a supplemental paper "correctly amending the reissue application." By this Response, Applicant has underlined claims 80-91, thereby placing them in proper reissue claim format.

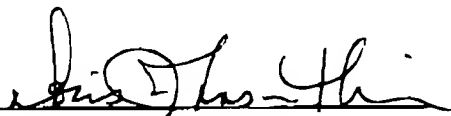

In the April 21, 1999, Communication, the Examiner also indicated that subsequent to placing claims 80-91 in the proper form, an Office Action treating all of the pending claims would be issued. The Examiner also indicated that if the application is not in condition for allowance, the Office Action would be non-final.

Applicant requests examination and allowance of the pending claims. Applicant also requests consideration of the Amendment filed February 17, 1999.

If there is any fee due in connection with the filing of this Response to
Communication, please charge the fee to our Deposit Account No. 06-0916.

Respectfully submitted,

FINNEGAN, HENDERSON, FARABOW,
GARRETT & DUNNER, L.L.P.
